ISPO AWARD
RECIPIENTS 2015/2016
Every year ISPO honors the most exceptional products of the sports industry with the ISPO AWARD. ISPO itself is far more than a display of new products. It is the leading international platform for the entire sports business. Many decision makers and creative minds behind the brands meet at the show.

The ISPO AWARD consists of a total of three divisions: Products, Asian Products and Communication. The Product division is divided into the five segments: Action, Outdoor, Ski, Performance and Health & Fitness which each are again divided into product-specific categories. The segments Communication and Asian Products are also divided into several categories.

| CATEGORIES         |                   |                  | Several Categories

**Products:** Innovative sports products from all segments.

**Asian Products:** This division offers up and coming sporting goods companies headquartered in Asia an independent, objective platform with an opportunity to enter their products for evaluation.

**Communication:** The division for creative projects revolving around sports. Agencies, marketing departments, graphic designers or photographers, all of whom play an essential role in the development and the image of the sports industry, are able to enter their projects for this competition.

An independent, international jury evaluated the entries for each individual division and selected the best entries to be honored with the following titles:

**ISPO AWARD PRODUCT OF THE YEAR** - for the best overall product, selected from the GOLD WINNERS of each segment.

**ISPO AWARD ASIAN PRODUCT OF THE YEAR** - for the best Asian product within the group of GOLD WINNERS.

**ISPO AWARD COMMUNICATION OF THE YEAR** - for the overall most creative project within the group of GOLD WINNERS

**ISPO AWARD GOLD WINNER** - for the best project/best product within a category.

**ISPO AWARD WINNER** - for additional projects/products within a category deserving an award.

This year the independent Eco Responsibility jury panel chose one product to receive the **ISPO AWARD ECO ACHIEVEMENT** due to its significant commitment to sustainability.
LUUV
LUUV

LUUV is a camera stabilizer for action cams and smartphones. Videos captured by handheld cameras usually contain significant camera shake, causing many frames to be blurry. By mounting a camera onto LUUV, every user is now able to shoot smooth and shake-free videos. LUUV is tailored for outdoor sports and combines advanced professional steady-cam technology with high user-friendliness, making it a great tool for all everyday activities.

ZELERITAZ RACING SPORTS

DWS - DETACHABLE SPEED SKATING WHEELS SYSTEM

DWS Z1 is a sleek, streamlined, high-performance and eco-friendly wheel system that weighs less than 155 grams, yet it's highly durable due to its unique aluminum rim. The wheel has unparalleled strength and speed. Additionally, it requires less material and time to replace. The elimination of a non-recyclable plastic core makes the process of changing wheels better for the environment and it's revolutionizing the skating industry.

Hall A3 / Booth 242

HYDE

WINGMAN

The Hyde Wingman is the first inflation vest designed for swimmers, surfers, and paddlers. It's the sleekest and most functional life vest on the market, offering features like a hydration pouch, zipped pocket and modular packing system. Its patented design includes Hyde’s Tripper Bursting Zipper which allows for easy deflation and rearming. The low profile fit creates minimal drag for swimmers and maximum range of motion for paddlers.

Hall A1 / Booth BN 33

YES.

THE 20/20 POWDERHULL

PowderHull combines two distinct rocker lines creating, when blended together, a pronounced base concave at either end. This concave shape reacts differently when riding in powder. At the leading end, the concave draws air under the board causing lift and floatation. At the tail, the exaggerated rocker line down the center speeds the release of snow, causing the tail to drop. Perfect planing angle is achieved going switch or regular.

Hall A1 / Booth 203-205 + 520
Dador Quantum is the world’s first Climatex drysuit for stand-up paddling. The athlete is never too cold, never too wet and never too warm.

The Furnace Carbon combines the best customized neoprene qualities and a uniquely engineered entry system.

NFX2 is the most technically advanced cylindrical goggle ever made, featuring Swift Lock Technology with an injected lens.

PRISM backpacks offer a unique modular solution with optimal protection, comfort and durability features.

The PRO-X Knee-Shin Guard uses G-Form proprietary impact technology. It’s flexible, lightweight and CE-1621 certified.

Highback are produced with 40% Ramie fiber: a light, natural and renewable material that grows in the manufacturer’s country.
LA SPORTIVA

**G2 SM**

Developed in cooperation with Simone Moro, G2 SM is an ultra thermal, dual-layer shoe for extreme mountaineering. Maximum water resistance is provided by the gaiter lining and the inner insulation package. The Cordura® fabric guarantees abrasion resistance. Volume and weight are minimized by the Honeycomb Tech midsole. The inner shell uses the exclusive quick lacing BOA® system for maximum user-friendliness and a precise fit.

Hall B5 / Booth 204

---

KATADYN

**KATADYN BASE CAMP PRO 10L**

The new Katadyn Base Camp Pro 10L offers fastest flow rate, largest capacity and hydration bladder compatibility. It easily converts into a camp shower using the unique Katadyn Shower Adaptor. With an incredibly fast two-liter/minute flow rate, the new 0.2-micron Ultra Flow Filter Technology provides a quick turnaround from natural water source to a clean, drinkable water supply without backflushing. Ideal for larger groups.

Hall A6 / Booth 524

---

SEALSKINZ

**NEOPRENE HALO OVERSHOE**

A 4 Lumen hi-powered LED light built into the rear of the neoprene overshoe emits a bright light visible from over 500m, ensuring you are seen when out and about in low light. Switch between flashing or continuous to adjust the way you are illuminated. Close-fitting with silicone leg gripper and Kevlar heel and toe for wear resistance. Hard-wearing neoprene material with storm flap inside the side entry’s high quality YKK lockable zip.

Hall B3 / Booth 212

BILLABONG

**APEX BOA PACK**

The Apex BOA Pack incorporates world-first innovation with the use of the BOA System and the best of fabrication supplied by Cordura. It’s a multi-purpose pack of the highest quality construction and fabrication, with the ability to be used in three different formats. The pack’s features include BOA closure, a stowaway rain cover, a detachable and drainable wetsuit storage system, laptop/tablet and passport sleeves, a fin storage and a welded waterproof pocket.

Hall A2 / Booth 107+201
This new Merino Air Baselayer is a fusion of sustainably sourced materials and technological innovation. The result is a garment with exceptional environmental and performance properties. It offers outstanding warmth for its weight, is more breathable and better fitting than conventional Merino baselayers and it maintains the natural odor-fighting properties of wool.

Hall A2 / Booth 107  Hall A3 / Booth 301

Swift is the fastest screw-in ice screw in the world, 1.85 times faster than other ice screws. The twin thread structure simultaneously drills into the ice face, making the ice screw stand steady immediately. This allows the ice screw to spin a lot quicker. The superlight hanger and crank system contains hot-forged aluminum alloy hangers which are lighter than standard steel hangers.

www.kailasgears.com

The Rap Line II is the first accessory cord with a dynamic safety reserve. The cord is made from a combination of high-strength polyamide and aramid. It’s tested for two falls used as a twin rope in line with EN 892. Thanks to its low elongation values, it is suitable for hauling equipment or abseiling.

Hall B5 / Booth 328

Refillable stove system which does not require the user to take an additional gas canister. This stove includes a fuel tank that is refillable with isobutane gas. It is lightweight and compact, even with all required operational equipment. Easy to refill and easy to use. A pressure safety control system ensures safety whilst on the move. It’s innovative in design and helps prevent the improper disposal of fuel canisters in the outdoors.

Hall B5 / Booth 632

Snowfoot is a revolutionary snowshoe designed to conquer any terrain in any condition. Lightweight, compact and versatile, it allows an unprecedented range of movement on the steepest slopes. With innovative technology developed to maximize flotation and grip and an integrated alpine-inspired crampon system, Snowfoot is an all-in-one mobility tool that offers a breakthrough approach to mountain sports and professional work.

www.snowfoot.eu
Shot Evoluzione are iconic sunglasses, featuring a 7.6-inch wide polarized mirror lens and Nastek lenses with Nasa technology which allow UV block and up to 98.9% blue light control up to 98.9%. The extremely low weight (only 28 grams) combined with the extra width of the lens make these iconic sunglasses with temple angle regulation one of a kind, suitable for free fighters and speed addicted athletes.

SHOT EVOLUZIONE

Hall A4 / Booth 426+252

The Trident Winter is an all-round winter shoe. It provides comfortable and precise fit for approaches, has a dryedge waterproof, breathable membrane and a full PrimaLoft 200g insulation. Besides being perfect for snowshoeing, it’s also a great casual shoe for winter conditions thanks to its modern and stylish design.

MILLET
TRIDENT WINTER

Hall B5 / Booth 516

The first hands free shoe lacing ever, Treksta’s Zerotiefoot activated lacing system eliminates the need to bend, manually put-on and tighten your shoes. Roll your heel on the ground for lacing up, step on the release buckle to open the lacing again. Simplify with ZEROTIE.

TREKSTA
HANDS FREE 103 GTX

Hall A6 / Booth 512

It takes a full four days for a woman in the small Nepalese village of Kirtipur to knit one of these beautiful sweaters - by hand, of course. A limited collector’s piece, it’s super warm and made even more so by the PrimaLoft® Silver insulation in the torso, and the plush fleece lining in the hood, pockets, and collar. Perfect for music festivals, late nights by the campfire and dark winter days. One to treasure for a lifetime.

SHERPA ADVENTURE GEAR
KIRTIPUR SWEATER

Hall B6 / Booth 424

An ultimate performance down parka for Arctic conditions, designed for exceptional lifespan and minimum impact on the environment. The outer fabric is G-1000 Eco with G-1000 Heavy-Duty Eco reinforcements on exposed areas. Padded with ethically produced, 100% traceable down. The deep hood, large pockets, and other features are designed to offer dependable protection from the elements and for easy handling when wearing bulky gloves.

EXPEDITION DOWN PARKA NO. 1

Hall A1 / Booth 520  Hall A6 / Booth 202
The powermonkey explorer 2 houses a powerful 6000mAh lithium battery and is capable of recharging an iPhone 6 up to three times, a GoPro Hero3+ four times, or a Garmin Edge 1000 four times, plus a plethora of other devices. Made from aluminum, this tough, rugged charger can support the weight of a Land Rover and has an IP rating of 67 thanks to the bespoke bathplug style cable connector system.

Hall A6 / Booth 418

The ultimate in breathable thermal protection, the Pulse Hybrid is performance-driven, fusing the latest in premium materials: Pertex® Quantum, Polartec® Alpha® and Polartec® Power Stretch®. The new Polartec Alpha 120g along torso and back is twice as warm but only 20% heavier. The featherlight Pertex Quantum protects against showers without impeding the Alpha’s breathability while the Powerstretch side panels and arms keep movements free.

Hall B6 / Booth 510

Barrier Pro Belay is Haglöfs’ warmest reinforcement jacket in its Mountain segment. It offers spacious fit since it is designed to be worn on top of a shell jacket at the summit or during a short break on the mountain. New this year is the pocket design that doubles as ventilation. The Barrier Pro Belay is a bluesign product.

Hall A6 / Booth 212

The Nuclei AR jacket is the culmination of Arc’teryx’ desire for a highly hydrophobic insulated jacket that maximizes its warmth-to-weight ratio in the most compact form possible. Alpinists obsess over weight and bulk in an effort to increase efficiency. Arc’teryx used optimized design, construction and materials to create a versatile insulated jacket for those seeking a warm, hydrophobic garment that you will never hesitate to take into the mountains.

Hall B5 / Booth 308

Waterproof and breathable, recyclable three-layer shell jacket featuring recycled fabrics, a hydrophilic polyester membrane and fluorcarbon-free DWR. Its fit is designed for comfort and style in the urban setting just as well as for a powderday in the backcountry. Features include fully taped seams, water-repellent zips, single-hand two-way adjustable and helmet-compatible hood, removable powder gaiter and a lot more.

Hall A6 / Booth 232
The new Topper Station top-rope anchor from EDELRID reduces rope wear, avoids tangles, and improves safety thanks to a gate that prevents double clipping and accidental unhinging.

**Hall B5 / Booth 328**

The Comfort Plus features a Dual Layer construction: two independent high-resolution offset layers of Air Sprung Cell™ distributing your body weight and shape over more cells. Exkin Platinum® thermal technology radiates lost heat back to the user. Thermolite® insulation prevents convective heat loss from your warm body to the cold ground. The Dual Layer design also ensures a level of built-in redundancy.

**Hall A6 / Booth 314**

In addition, 38% recycled polyester are used for the production.

Hall B3 / Booth 302
Meidjo is a globally patented step-in telemark binding which is very easy to fit. At 440g, it’s the lightest binding, weighing half of similar products on the market. Meidjo has a low-tech toe interface and is a true free-pivot binding specifically designed for telemark skiing. Meidjo is safe and features an adjustable release system to protect the knees. Integrated in the heel piece is a sensor that allows you to find a lost ski from a distance up to 30 meters.

Hall A3 / Booth 420A

The MTN Lab is developed for and by Salomon’s Mountain Collective. Superior skiing performance comes from an Oversized Pivot for direct energy transmission, a Carbon Spine for rearward support when skiing, and the horizontal Surelock mechanism which ensures that the boots won’t unlock accidentally. Salomon used its Custom Fit 3D full thermo liner, and its venerable fit DNA to ensure precise and personalized fit.

Hall A1 / Booth 209  Hall A4 / Booth 402+502

Carbon Skate Lab is a radical departure from any Nordic boot on the market today, shattering the limits of performance, low weight, and fit. The full carbon shell sculpted around a 3D pre-shaped liner delivers a new standard in energy transmission and ski feel, along with drastically less weight (900g) and a level of comfort never felt before. Worldcup-proven with more than 70 athletes over three years, Carbon Skate Lab is the future of faster skiing.

Hall A1 Booth 209  A4  Booth 402+502

Hydrophobic N333p-X nylon maintains drier and warmer hands by resisting water absorption, and it reduces heat loss through conduction. The Lithic glove uses three types of PrimaLoft insulation to meet different warmth needs and maintains dexterity and grip. TPU reinforcements provide additional grip and abrasion resistance.

Hall B5 / Booth 308

Aerospace is the first goggle working just as well during both ascent and descent. This goggle is meant to be used on approach routes. To avoid fogging during ascents, the SuperFlow System enables the lens to slide forward for greater ventilation, while the eyes remain perfectly protected from the sun. When it’s time for descent, simply pull the lens back towards the goggle and enjoy total comfort.

Hall A3 / Booth 415
The Rooster Discesa RS helmet is Sweet Protection’s second-generation helmet to meet the new F.I.S. RH 2013 standard for ski racing. It’s developed in close cooperation with Aksel Lund Svindal and offers several unique safety features, while still being low-volume and lightweight.

Hall A3 / Booth 407

A versatile insulation piece with great breathability. With a full-zip solution, these 3/4-length pants can easily be put on and taken off without taking off your boots. The face fabric is lightweight, and Polartec Alpha® makes for great breathability. Custom fit makes the pants comfortable and easily adjustable. They are the perfect companion on colder days.

Hall A3 / Booth 401

A revolutionary DryDyed eco-friendly technical ski jacket, the first time ever made from woven material. Made entirely from recycled or mechanically recyclable polyester, with all the functionality and protection you need. This jacket with hollow fibers and ThermoCool® padding in two different fiber-counts is waterproof, breathable, and durable with microclimate body temperature control.

Hall B1 / Booth 304

High-performance down jacket with all the proven heat-welded, non-quilted, seam-taped construction features for superior warmth and dryness. This year, the jacket also features the uniquely new and clever StreamLine system, which doubles as a design accent on chest and Para-Hood to channel water away from pocket openings and face. The outer fabric is made of four-way Dermizax Micro Stretch, and Heat Navi converts light into heat for added warmth.

Hall B1 / Booth 200  Hall B2 / Booth 213

The Mission Pants are Black Diamond’s fully equipped Gore-Tex® ski pants, outfitted for back-country use with the patent-pending PIEPS Pocket™. A partnership between Black Diamond and PIEPS™, this protective and universal beacon pocket is anchored to an integrated webbing waistbelt. When used as directed, the PIEPS Pocket™ provides an innovative and quick-access alternative to the traditional chest harness for faster access and better comfort.

Hall B5 / Booth 208
This new rental product is set to revolutionize skiing for cold-sensitive skiers. The heated ski boots are comfortable thanks to the heating system integrated in the liner. In addition, the boots feature a 3D insole for great fit and foot support. The liner’s integrated heating system is extremely user-friendly to both skiers and shops. It’s easy to use and charge, offers three heating levels, and it’s available for men and women.

Hall A4 / Booth 222

All-Mountain ski with a shear-thickening material that allows for variable dampening. Incorporated into the core during layup, the special material provides low dampening during low-impact, low-intensity, soft skiing. As your skiing becomes faster, more energetic or conditions become harder, the ski adapts automatically and provides significantly higher dampening to smoothen, control, and stabilize the ride.

www.renounskicompany.com

The ski’s construction is completely new due to the dual shaped metal of the new Amphibio 4D technology, a combination of woodcore and shaped Ti. In combination with the Amphibio Profile, it provides supreme all-mountain versatility and edge precision. The Amphibio® Profile ensures edge grip and easy turning; the Dual Shaped Ti guarantees precise entry and quick exit. Additionally, vibrations are reduced by 30% and the thinner profile reduces weight by 10%.

Hall A1 / Booth 217  Hall A5 / Booth 214 +216

This revolutionary adhesive full-length ski base attachment powered by Fischer’s Crown Technology allows you to lengthen your uphill stride and it provides permanent grip in all conditions. PROFOIL is made from a waterproof material that prevents water absorption, thus eliminating weight gain while ascending. With PROFOIL, you reach the summit faster, at the same time you will experience an entirely new sensation of comfort and performance.

Hall A4 / Booth 202

The best of both worlds: lightweight on the inside, with all the characteristics of a freeride-oriented downhill ski on the outside. The Jackdaw is a reliable buddy on extended trips. The medium freeride width provides enough buoyancy for slopes covered in deep snow. Thanks to the construction with full rocker, tip & tail taper, and a slightly tighter set-up, the Jackdaw is an easy ride. Even in varying snow conditions, it’s all fun and games!

Hall B6 / Booth 608

Built from Zero-Gravity foam and using On’s patented Swiss CloudTec technology, the Cloud is the lightest running shoe in the world, yet offers outstanding cushioning and impact protection. It combines the opposite characteristics of a cushioning shoe and a minimalist shoe in the same product. The result is a well-protected landing, a responsive takeoff and a feather-light running experience. The shoe also features a new adjustable easy-entry lacing system.

POLAR
A300
Polar A300 is a fitness and activity monitor with waterproof design, changeable wristbands, and long battery life.

Hall B4 / Booth 301
Hall C1 / Booth 20
The Hubber is a modern and durable ski and snowboard helmet with many practical features. Picture wants to show that it’s possible to design efficient and good looking helmets with a small environmental footprint. 100% of the liner is made from recycled EPS (expandable polystyrene) collected from leading Japanese auto makers. In addition, the outer shell is made from PLA (polylactic acid), a polymer derived from corn, which is a renewable resource.

Hall A2 / Booth 203
TREKSTA
HANDS FREE 103 GTX

ZeroTie’s foot activated lacing system ties your shoe without the use of your hands or bending down to the feet. You slip on your shoe and slide the heel for lace-up. To release the lacing, you simply step on the release buckle. Thanks to Gore-Tex, the shoe is waterproof, breathable and moisture wicking. And with IceLock, a rubber sole with electrostatically aligned micro-glass filaments, it’s perfectly prepared for use in wet and icy conditions.

Hall A6 / Booth 512

MERINO MATRIX FOR PERFORMANCE MERINOV
HYDRO-DUCT

A new special finishing technology developed in partnership with AWI is used for the production of Hydro-Duct. It enables rapid absorption of moisture into the fabric and transfers it to the outside of the fabric where it evaporates. When applied to Merino wool, the fibers change from hydrophobic to highly hydrophilic-prone, resulting in the absorption of all moisture and providing great comfort during exercise.

Hall B3 / Booth 510

TOREAD
POLAR WORKBOOTS

Toread’s Polar Workboots are first of their kind to feature a one-piece outsole to midsole design that ensures complete, long-lasting waterproof insulation even in the most extreme conditions. Additionally, Toread’s innovative TiEF PRO waterproof fabric is used for the inner lining, maximizing breathability and durability, and allowing the inside of the shoe always to stay comfortable.

KAILAS
NIU A (7+)

The three-quarter length of the NiuA (7+) climbing pants makes footholds easier to see when working your way up a technically demanding climbing route. Made of quick-drying, durable, lightweight and elasticated Cordura fabric for high performance, the pants offer seamlessly laser-bonded 3D design at the knees and a diamond-shaped 3D crotch for freedom of movement. Equipped with a sturdy chalk bag loop, the Niu-A(7+) are great for climbing the crag.

www.kailasgears.com
FENIX
BIKE LIGHT BC30R

BC30R is a bike light featuring Fenix’ exclusive Dual Distance Beam System. The OLED display screen clearly shows the remaining runtime of the current output level and the battery level. To enable superior heat dissipation, it employs a cooling fins design. Utilizing two neutral white LEDs, it delivers an output of max. 1,600 lumen. Thanks to the easy switch design, it’s the ideal lighting device for night riding.

Hall B5 / Booth 622

KAILAS
SWIFT ICE SCREW

Swift is the fastest screw-in ice screw in the world, 1.85 times faster than other ice screws. The twin thread structure simultaneously drills into the ice face, making the ice screw stand steady immediately. This allows the ice screw to spin a lot quicker. The superlight hanger and crank system contains hot-forged aluminum alloy hangers, which are lighter than standard steel hangers.
