

## Press Information

March 2017

### Meet the members of the interdisciplinary Network nanInk at LOPEC 2017, Munich

**Würzburg/Munich, March 2017** - Following the successful trade fair presence in the past year, the **Cluster Nanotechnology** will be exhibiting again with the **network nanInk** ([www.nanoink.de](http://www.nanoink.de)) at LOPEC 2017. The Network nanInk focusses on the formulation of special inks and the development of inkjet related process technologies. It groups SMEs, large companies and scientific & research institutions to implement innovative products and applications that conserve resources on a sustainable basis. In doing this, it exploits the technical benefits of the nano components in high-performance inks. With expertise in nanomaterials, process and dispersion technologies, analytical methods, quality control as well as the formulation of inks, the network is very well positioned to offer customized solutions for the industrial inkjet printing market. The network is funded by the Central Innovation Program for Small- and Medium-Sized Businesses (ZIM) of the German Federal Ministry for Economic Affairs and Energy.

The initiation of new business relations is in the focus of the trade fair participation of the network nanInk. LOPEC offers an optimal platform to generate contacts and to search for specific cooperation partners. This applies in particular to product developers and decision makers from the industry seeking either for new trends and innovative technologies or for new developments and solutions of their problems.

Benefit from the various synergies offered by the interdisciplinary work of the network and visit **nanInk and its partners** on the joint stand with **EXAKT Advanced Technologies: Hall B0 / Stand 414**, directly across the Demoline area. Learn more about the network, the partners, major topics such as special inks, process technologies and printing systems as well as possible innovative applications for nanoinks.

Please ask for a voucher code from us to order a free entry ticket for your planned visit to LOPEC.
